

IntelliBatt Packaged Solutions

Combining strategic design, technical innovation and human expertise, IntelliBatt offers integrated solutions that put the “safe” in failsafe. We provide some of the world’s largest and most demanding organizations with a single vendor solution to the challenges of achieving 24x7 insurance against power failure and data loss. These include:

- Superior VRLA batteries pre-installed in easy-to-access cabinets
- Pre-installed and integrated battery monitoring hardware
- Continuous monitoring and reporting on all aspects of battery performance and state
- A Network Operations Center to analyze, report on and support your IntelliBatt deployment delivering a real time, secure, web view integrated with the physical system
- Predictive and trend monitoring to facilitate cost efficient “condition-based” maintenance and unit replacements versus legacy manual maintenance and replacement which has high risk, low visibility and high cost

Packaged and Custom Solutions

IntelliBatt offers packages for several common business scenarios. We will also work with your IT staff to craft custom solutions to meet your needs.

- Package One: Data Center Builds or Expansion Projects
- Package Two: Battery String Replacements
- Package Three: Monitoring for Existing Battery Strings
- Package Four: Remotely Monitor Existing Battery Monitoring Equipment
- Package Five: On-Site Battery Services

Save time and money—get it right the first time

Package One: New Data Center Builds, Expansion or Retrofit Projects

UL-listed cabinets with batteries and monitoring equipment installed and tested:

- Highest quality batteries available to ship within 1-2 weeks—or sooner in emergency situations
- Individual battery level battery monitoring system unit monitors impedance, voltage, temperature, current and other key data points
- One year of our industry-standard, web-based battery monitoring services, powered by IntelliBatt sister company Data Power Monitoring Corporation (DPMC)

Why just replace when you can upgrade at the same cost?

Package Two: Battery String Replacements

UL-listed cabinets with batteries and monitoring equipment installed and tested:

- Highest quality batteries available to ship within 1-2 weeks—or sooner in emergency situations
- Battery level monitoring system unit monitors impedance, voltage, temperature, current and other key data points

- One year of our industry-standard, web-based battery monitoring services, powered by IntelliBatt sister company Data Power Monitoring Corporation (DPMC)

Lower cost and better functionality than any other monitoring upgrade

Package Three: Monitor Existing Battery Strings

Add battery visibility by upgrading your installed battery strings with robust monitoring, analysis and reporting capability:

- Individual battery level battery monitoring system unit monitors impedance, voltage, temperature, current and other key data points
- One year of our industry-standard, web-based battery monitoring services, powered by IntelliBatt sister company Data Power Monitoring Corporation (DPMC)

Integrate your existing battery monitors into one comprehensive system

Package Four: Monitor Existing Equipment

Integration of existing battery monitoring equipment (e.g. Alber, BTECH, Cellwatch, PowerShield, APC, etc.)

Integrated remote monitoring services across multiple sites with existing equipment or sites with disparate battery monitoring platforms, provides detailed real-time views of every battery and every string

- Extend the life of your batteries by 6-24 months using or remote monitoring service and asset management system
- Eliminate your risk of battery caused UPS load loss by closely monitoring the health of your batteries

Installation and maintenance services across for all your battery assets

Package Five: On-Site Battery Services

Ensure that your backup battery installations are maintained by qualified experts who understand today’s more complex integrated battery systems

- Comprehensive solution for all facets of battery installation and preventive/corrective maintenance services on new or existing battery strings
- Safety considerations and observation of IEEE maintenance standards and practices are strictly adhered to
- Integrate your corrective and preventative maintenance with our monitoring services platform for one stop shopping versus managing multiple vendors every time you have a battery issue
